EXCELLENCE AND TECHNOLOGY AT THE SERVICE OF LUXURY

Thanks to state-of-the-art technologies and highly trained personnel, we offer customized interventions for every need:

- Complete cleaning of the bilges, removing oily residues and unpleasant odors for a safe and hygienic environment.
- Full sanitization of the interiors, including cabins, kitchens, and lockers, for absolute comfort.

TAILORED TREATMENTS FOR FABRICS AND UPHOLSTERY

Textile surfaces require special care:

- Cleaning and stain removal for carpets, sofas, internal and external cushions, curtains, and leather upholstery.
- Deep sanitization of mattresses to eliminate allergens and invisible impurities.
- Application of **MCA-certified fire-retardant treatments**, ensuring safety on board.

ADVANCED OZONE SANITIZATION

To eliminate bacteria, viruses, molds, and persistent odors, we use ozone treatments, a natural, ecological, and safe system that penetrates every space without leaving chemical residues.

INTERNATIONAL STANDARDS AND ABSOLUTE DISCRETION

We operate according to internationally recognized protocols, constantly investing in innovative technologies and staff training. Our goal is to deliver flawless results while respecting the privacy and safety of owners and captains.

YOUR YACHT DESERVES THE BEST

By choosing us, you gain a trusted partner capable of preserving the value and beauty of your vessel. Contact us for a dedicated consultation and discover a standard of excellence that redefines onboard care.

Machinery and products used for operations:

GEYSER 2.0

The Geyser 2.0 is a new high-pressure professional steam cleaner designed for cleaning and sanitization.

This 4-in-1 multifunctional steam cleaner allows the use of dry steam, wet steam, foaming detergent, and also vacuuming of liquids and dust.

Thanks to its patented system, which extracts wet steam directly from the boiler without using cold water, it provides an optimal cleaning experience.

With increased pressure up to 9 bar, it delivers higher performance and lower energy consumption compared to traditional 7-bar models.

The Geyser 2.0 offers versatility, reliability, and superior performance.

DÙCTILE

Odorblock

Omologato da
Alcantara®

Ideale per ogni
tipologia di tessuto

APC Cleaner - All
Purpose Cleaner

DÙCTILE is an extremely concentrated and versatile detergent with high cleaning power, effective on all types of surfaces, both inside and outside boats.

The product has been approved by Alcantara® for removing stubborn stains such as beverages, organic residues, and grease without discoloring fabrics.

Its innovative cationic surfactants leave fabrics soft and smooth, which is unusual for an APC (All-Purpose Cleaner).

For a gentle yet deep clean on plastics and a like-new finish, DÙCTILE can be used with a brush to create an easy-to-work foam that can be wiped away with a dry microfiber cloth, or with extraction and steam machines.

Thanks to its “Odor Block” technology, it neutralizes unwanted and unpleasant odors from the cabin, such as cigarette or e-cigarette smoke, leaving a long-lasting fresh and clean scent.

The versatile formula makes it both effective and safe on even the most delicate fabrics, making it ideal for removing stubborn dirt such as oil and grease stains.

PROFESSIONAL MICROFIBER CLOTHS

Microfiber cloths are distinguished by their extremely fine fibers, with a linear mass of less than one decitex—meaning 1 gram of fiber per 10 km. Made from polyester, acrylic, and polyamide, this blend creates fibers as thin as a human hair and twice as fine as silk.

The difference between standard and professional microfiber lies in two key factors:

- Polyester and polyamide ratio: Polyester provides dust-attracting and degreasing properties, while polyamide enhances absorption and softness. Our professional microfiber cloths are made of 80% polyester and 20% polyamide.
- Density or GSM (g/m²): Typically ranging from 200 to 500, depending on the cloth's purpose. Lower-density cloths are mainly used for glass cleaning, while higher-density cloths are ideal for vehicle body cleaning and drying. Our microfiber cloths have a density of 350 g/m².
